

Adamberg, Signe Metabolism of levan by fecal microbiota	40
Ahmed, Ayaz Gut microbiome analysis between hyperthyroid and healthy individuals	41
Presenter: Lei, Zhou	
Al Wakeel, Suaad The effect of mycotoxins found in some herbal plants on biochemical parameters in blood and on liver and kidney structure of female albino mice	42
Berer, Kerstin Impact of dietary metabolism by gut microbiota on the pathogenesis of spontaneous CNS-specific autoimmune disease	43
Bojic, Svetlana The abundance of microbiota constituents in ulcerative colitis and irritable bowel syndrome patients diverges from balanced microbiota in opposite directions	44
Boleij, Annemarie Horizontal transfer of the <i>Bacteroides fragilis</i> conjugative transposon CTn86 in the human gut	45
Boucinha, Lilia Comparative 16S analysis – a mouse core gut microbiome?	46
Brandsma, Elke Insulin resistance is linked to decreased diversity in the microbiome	47
Brandt, Bernd W. NGS-eval: NGS Error analysis and novel sequence VArIant detection tool	48
Brejnrod, Asker Daniel Impact of environmental factors on vaginal microbiomes in pregnancy	49
Bresciani, Anne Keystone gut microbes and why low richness microbiomes are less resilient	50

Brix, Susanne	
Bacterial endotoxin variants within the lung microbiome of asthmatics	51
Brown, Richard G.	
Erythromycin treatment in PPROM associates with increased vaginal microbiome diversity and fails to exhibit anti-inflammatory effects on vaginal epithelial and amnion cells in vitro	52
Bui, Nam	
Butyrate production from lysine by a human gut commensal	53
Butt, Julia	
Association of <i>Streptococcus gallolyticus</i> subspecies gallolyticus (<i>S. gallolyticus</i>) with colorectal cancer: serological evidence	54
Choudhury, Ranginee	
Generic transcriptional response of <i>E. coli</i> to stress	55
Chouvarine, Philippe	
NGS platform for analysis of microbial metagenomic samples	56
Clavel, Thomas	
MIBC – The Mouse Intestinal Bacterial Collection: Host-Specific insights into cultivable diversity and genomic novelty of the mouse gut microbiome	57
De Filippis, Francesca	
Impact of diet on the salivary microbiome and metabolome	58
Depner, Martin	
Bacterial microbiota of the upper respiratory tract, farming exposure, and childhood asthma	59
Doetsch, Andreas	
Oral microbiota associated with dental implants is affected by the cement type	60

Dörner, Elisabeth	Presenter: Dörner, Elisabeth; Fricke, W. Florian	
Fecal metagenomic sequence analysis to study microbiota dynamics at the bacterial strain level in the context of <i>Clostridium difficile</i> infection and fecal microbiota transplantation		61
Ercolini, Danilo	Presenter: Ercolini, Danilo; De Filippis, Francesca	
A Mediterranean dietary pattern determines specific traits in the gut microbiota and associated metabolome		62
Ercolini, Danilo		
Changes in microbiota and bioavailability of polyphenols upon whole-grain consumption by obese subjects with unhealthy lifestyle		63
Fairclough, Virginia		
Using proportionality measures to analyse changes in inter-species dependencies within the human microbiota		64
Fernandes, Gabriel R.		
Extending enterotypes to metabolism and inflammatory response		65
Ferrocino, Ilario		
Functional metagenomic profiling of the intestinal microbiome in subjects consuming omnivore, ovo-lacto-vegetarian and vegan diets		66
Fu, Jingyuan		
The gut microbiome contributes to a substantial proportion of the variation in blood lipids		67
Garzetti, Debora		
A defined mouse microbiota community to study bacterial genome evolution and functionome in the gut		68
Giloteaux, Ludovic		
Altered gut microbiome in SEID patients in comparison to healthy controls		69
Gupta, Archana		
Role of <i>H. pylori</i> in oral carcinogenesis		70

EMBL Conference on the Human Microbiome

Gupta, Archana Bacteria - "A Commensal or Carcinogen"	71
Haange, Sven Protein stable isotope probing (protein-SIP) reveals the metabolic active community subset of the intestine microbiota	72
Hansen, Lea Benedicte Skov The effects of a whole grain rich diet on the community structure of the gut microbiome	73
Hanson, Buck Eating heavy: Stable isotopes capture <i>in vivo</i> ecology of gut microbiota in health and disease	74
Heintz-Buschart, Anna Integrated omic analyses of microbial communities and populations in the human gut	75
Hoving, Lisa Inulin in combination with a high cholesterol diet induces liver inflammation in APOE*3-Leiden.CETP mice	76
Hübner, Alexander Analysis of the oral microbiome for signals of human population structure using bacterial genomes	77
Hunter, Christopher I GigaDB, sharing metagenomics data in an open and citable way	78
Huseyin, Chloe The Human Gut Mycobiome	79
Janssens, Pilou Long-term green tea supplementation does not affect human gut microbiota, fat absorption, resting energy expenditure and body composition	80
Katiraei, Saeed Intestinal microbiota regulate the inflammatory response of splenocytes	81

Kaysen, Anne		
Dynamic change of host gastrointestinal microbiome and immune status in relation to mucosal barrier effects during chemotherapy and immune ablative intervention in humans	82	
Keil, Melanie		
Dietary tryptophan is required for CNS infiltration of encephalitogenic T cells	83	
Khan, Shams		
Metal and metal oxide nanoparticles and human oral microbiome	84	
Kim, Yongkyu		
DAFGA: diversity analysis of functional gene amplicons	85	
Kindinger, Lindsay		
The impact of cervical cerclage material on the vaginal microbiome in pregnancies at high-risk of preterm birth	86	
Klünemann, Martina		
Drug metabolism of human gut bacteria	87	
Kriegel, Martin		
Longitudinal microbial community profiling, IgA-Seq, and gut barrier analysis in antiphospholipid syndrome	88	
Kriegel, Martin A.		
Antiphospholipid autoantibody- and Th17 cell-dependence on the gut microbiota	89	
Lagkouravdos, Ilias		
IMNGS: the Integrated Microbial Next Generation Sequencing platform, a tool for the utilization of all available amplicon reads data for microbial ecology	90	
Le Roy, Caroline		
Impact of the antibiotic tiamulin on gut microbial ecosystem and host lipid metabolism	91	
Louis, Sandrine		
Impact of a very low calorie diet on the gut microbiota of obese patients	92	

EMBL Conference on the Human Microbiome

Mendz, George Comparison of vaginal and intra-amniotic microbiomes at Birth	93
Michel, Angelika Analysis of CagA serotypes with <i>Helicobacter pylori</i> multiplex serology	94
Mikkelsen, Kristian Hallundbæk Use of antibiotics and risk of Type 2 Diabetes: A population-based case-control study	95
Mitra, Suparna Title: Analysing <i>Bifidobacterium</i> in diverse animal populations for targeted microbiota therapies	96
Moelling, Karin Metagenomic analysis of the fecal microbiome and virome of a C.diff patient five years after FMT	97
Moen, Aina E. Fossum Comparison of 16S rDNA and rRNA datasets for characterization of the mucosal microbiota in patients with ulcerative colitis	98
Moran Losada, Patricia The microbial metagenome of cystic fibrosis lower airways	99
Murugesan, Selvasankar Colon microbiota in the Mexican Childhood Obesity	100
Palleja, Albert Gut microbiota compositional changes after gastric bypass surgery	101
Panahandeh, Pouda Characterization of the locus of enterocyte effacement in Shiga toxin-producing <i>Escherichia coli</i>	102
Pande, Pranav Mukund Indian Gut Microbiome: Subpopulation based structural and functional insights using 16S rRNA amplicon sequencing	103

Pou, Christian	Presenter: Barrientos-Somarribas, Mauricio; Pou, Christian	
An integrated approach for virome characterization of clinical specimens with low amounts of DNA/RNA		104
Pruteanu, Mihaela		
Drug-species interactions in the human gut microbiome		105
Quaak, Frederike		
Microbial populations as an indicator for the origin of human samples		106
Rasinkangas, Pia		
Study on the effect of piliation on the colonisation ability of <i>Lactobacillus rhamnosus</i> GG		107
Reichmann, Dana		
The role of stress-regulated protein plasticity in bacterial defense against its host		108
Reifsnider, Elizabeth		
The effect of breastfeeding on infant weight outcomes		109
Reijnders, Dorien		
Effects of gut microbiota manipulation by antibiotics on host metabolism in obese humans		110
Roager, Henrik Munch		
The effect of gluten on the host-microbial metabolism assessed by urinary metabolomics		111
Roat Kultima, Jens		
Mastering metagenomics with MOCAT		112
Ruiz, Alicia		
Dietary intervention reshapes gut microbial functional community though body mass index determines its metabolic output		113
Schaubeck, Monika		
Dysbiotic gut microbiota causes transmissible Crohn's disease like ileitis independent of failure in antimicrobial defense		114

EMBL Conference on the Human Microbiome

Schmidt, Sebastian		
Limits to robustness and reproducibility in the demarcation of Operational Taxonomic Units		115
Severgnini, Marco		
Microbiome signature of Behçet's syndrome patients		116
Sharma, Ashok K.		
Fast and accurate taxonomic classification of 16S rRNA hypervariable regions in metagenomic datasets using 16S classifier		117
Sharma, Vineet K.		
Reconstruction of bacterial and viral genomes from a metagenomic mix of sequence reads		118
Smith, Patrick		
The ageing microbiome in the naturally short-lived African Turquoise Killifish		119
Stämmler, Frank		
Estimating absolute abundances of bacteria in the intestinal microbiome		120
Stokholm, Jakob		
Caesarean section changes the neonatal gut colonization		121
Suryavanshi, Mangesh V.		
Exploring change of bacterial diversity and Oxalate Metabolising Bacterial Species (OMBS) in recurrent oxalate stone disease episodes		122
Suvorov, Alexander		
Probiotics and epidemic <i>Enterococcus faecium</i> strains: a different lifestyle due the genomic differences		123
Suvorov, Alexander		
Genetic and cultural study of the intestinal microbiota of rats with dysbiosis treated with different probiotics and their complexes		124

Thorsen, Jonathan		
A comparison of commonly used methods for differential abundance analysis of large-scale taxon-based microbiome datasets	125	
Tobar Toledo P. Silva, Natalia		
Metformin modules the gut microbiota and promotes increased intestinal uptake of 18F - FDG in diet induced obese mice	126	
Treichel, Nicole Simone		
Effect of hypoxia and bed rest on the human gut microbiota	127	
Tulstrup, Monica	Presenter: Bahl, Martin I.	
Antibiotic treatment affects intestinal permeability and gut microbial composition in Wistar rats dependent on antibiotic class	128	
Veiga, Patrick		
The endogenous gut microbiota dictates ecosystem permissivity to transient food-borne bacteria	129	
Veiga, Patrick		
Changes of the human gut microbiome induced by a fermented milk product	130	
Veiga, Patrick		
Host lysozyme-mediated lysis of <i>Lactococcus lactis</i> facilitates delivery of colitis-attenuating superoxide dismutase to inflamed colons	131	
Voigt, Anita		
The gut microbiome in response to temporal and technical variability	132	
von Bergen, Martin		
Adaptation of the active mucosal microbiota to high fat diet	133	
Wampach, Linda		
Early dynamics of the gastrointestinal microbiome in infants at risk of metabolic disease in adulthood	134	
Wang, Jun		
Extensive environmental influences on the human gut microbiome	135	

EMBL Conference on the Human Microbiome

Wilm, Andreas Robust and sensitive low-frequency variant calling from metagenomics sequencing data	136
Wuyts, Sander Microbial community analysis from various <i>Lactobacillus</i> niches using MiSeq sequencing	137
Zanzoni, Andreas Inference of the protein interaction network between <i>Fusobacterium nucleatum</i> putative secretome and the human host	138
Zeller, Georg SIAMCAT: Statistical Inference of Associations between Microbial Communities And host phenoTypes	139
Zhernakova, Alexandra Microbiota composition in irritable bowel syndrome	140
Zhu, Ana C. Inter-individual differences in the gene content of human gut bacterial species	141
