

Aguiar, Tatiana Q. New promoters for recombinant gene expression control in <i>Ashbya gossypii</i> identified through analysis of transcriptomic data	42
Albert, Frank W. Genetic variation in protein degradation	43
Aspert, Théo A novel methodology based on microfluidics to study replicative senescence in budding yeast	44
Avelar-Rivas, J Abraham Natural intra-species variation of the mutational effects of the TOR pathway in cell survivorship	45
Badet, Thomas Contribution of genomic structural variation to de novo gene birth	46
Ben-Aroya, Shay A-to-I RNA Editing: An overlooked source of temporal mutations that could be beneficial in the life cycle of an organism	47
Bisquert, Ricardo Subcellular location of melatonin production in <i>S. cerevisiae</i>: the search of N-acetyltransferases	48
Bora, Kerem Flexible morbidostat systems for experimental evolution studies	49
Boynton, Primrose <i>Saccharomyces paradoxus</i> genotypes persist through seasonal changes in their natural habitat	50
Brinco, Catarina The role of mistranslation in the acquisition of drug tolerance and resistance in <i>Candida albicans</i>	51
Presenter: Bezerra, Ana Rita	
Buczek, Mateusz The change in epistatic interactions under heat shock stress in <i>Caenorhabditis elegans</i>	52

EMBO Workshop: Experimental Approaches to Evolution and Ecology Using Yeast

Chou, Hsin-Hung		
Sequence space of the Shine-Dalgarno sequence		53
Cromie, Gareth		
Biased Meiotic Chromosome Segregation in Aneuploids Results from the Mismatch Repair System and Competition between Chromosomes		54
Csikasz-Nagy, Attila	Presenter: Gaizer, Tunde	
Role of cell-cell interactions in yeast colony formation		55
Dietrich, Fred		
The genome of <i>S. cerevisiae</i> looks a lot more like the genome of <i>Ashbya gossypii</i> than we previously thought		56
Espinosa-Cantu, Adriana		
The moonlighting phenotypes of yeast enzymes		57
Forche, Anja		
Specific in vivo-acquired chromosome trisomies result in commensal phenotype in the oral host niche		58
Fowler, Kyle		
Genetically encoded translational ambiguity facilitates protein evolution		59
García Ríos, Estéfani		
Molecular and physiological characterization of a new chromosomal rearrangement involved in sulfite adaptation of wine yeast		60
George, Shilpa		
Quorum sensing "cheaters" within <i>Staphylococcus aureus</i> populations are selected under aerobic growth		61
Ghiaci, Payam		
Massively parallelized evolutionary engineering of yeast for wine production		62
Gurvich, Yonat		
Surviving starvation, preparing for feast		63

Habig, Michael Histone posttranslational modifications affect chromosome stability in a plant pathogenic fungus	64
Hansen, Anne Sofie Lærke Growth-coupling of methyltransferase activity for evolutionary engineering of microbial cell factories	65
Hays, Michelle Discovering how yeast battle a genetic parasite: the 2-micron plasmid	66
Heineike, Benjamin Differential Expression of Whole Genome Hybridization Paralogs in <i>S. Cerevisiae</i> following PKA inhibition	67
Helsen, Jana Rewiring gene networks underlying a complex trait by adaptive evolution	68
Hénault, Mathieu Whole-genome long-read sequencing provides insights into transposable elements dynamics in natural populations of the wild yeast <i>Saccharomyces paradoxus</i>	69
Jacquel, Basile Integrative analysis of the response to hydrogen peroxide in single dividing cells	70
Jagdish, Tanush Two-way inference between genotype and fitness in a long-term evolution experiment	71
Jauffred, Liselotte Chiral sector boundaries in bacterial colonies	72
Jhuang, Han-Ying Genetic study of the polymorphism of regulatory decision-making in yeast	73
Johnson, Milo Genetic determinants of fitness effects in budding yeast	74

EMBO Workshop: Experimental Approaches to Evolution and Ecology Using Yeast

Koubkova Yu, Tracy Chih-Ting Foreign Hsp90 promotes phenotypic diversity through network evolution	75
Krieger, Gat Divergence in the modular organization of gene expression between related yeast species	76
Lairón-Peris, María Adaptive evolution of an interspecies hybrid yeast under ethanol stress: Genomic, transcriptomic and phenotypic landscape	77
Leen, Abraham Genome-wide expression analyses to dissect the genetic basis of gene regulation in a major fungal pathogen	78
Liepins, Janis Purine auxotrophy of budding yeast – advantage or not?	79
Lino, Felipe Resolving microbial interactions for improved industrial fermentations	80
Liti, Gianni Shared molecular targets confer drug resistance over short and long evolutionary timescales	81
Lukacisinova, Marta Genetic determinants of antibiotic resistance evolution	82
Machne, Rainer Chemostat Oscillations, Growth Laws & Evolution: Experimental Transcription of Proto-Genes during the Low Energy Phase?	83
Macías, Laura Convergent adaptation of <i>Saccharomyces uvarum</i> to sulphite resistance	84
Marad, Daniel Targeted Identification of Overdominant Diploid Mutations in Budding Yeast	85

Mellul, Anna		
Understanding a mechanism of incomplete penetrance of human tumor suppressor gene PTEN by adaptive evolution of <i>c. elegans</i>	86	
Morard, Miguel		
Aneuploidy and ethanol tolerance in <i>Saccharomyces cerevisiae</i>	87	
Natali, Federica		
Does aneuploidy increase cellular evolvability?	88	
New, Aaron M		
The genetic architecture of the GAL regulatory pathway	89	
Noiman, Liron		
A comparison of the balance between general and pathway-specific transcriptional regulation of amino acid biosynthetic genes in yeast	90	
Ortiz-Merino, Raúl A		
Genomics of hybrid yeasts: lessons from the <i>Zygosaccharomyces bailii</i> species complex	91	
Palkova, Zdena	Presenters: Palkova, Zdena; Vachova, Libuse	
Cyc8p and Tup1p differently regulate development of distinct types of yeast multicellular structures	92	
Palma, Margarida		
The transcriptional network regulated by the bifunctional <i>Zygosaccharomyces bailii</i> ZbHaa1 transcription factor in response to acetic acid- or copper-induced stresses	93	
Pawar, Pratik		
Microbial oil production using non-conventional yeast	94	
Peris, David		
iHyPr: a new tool for the generation of synthetic six-species hybrids	95	
Philippsen, Peter		
Conserved gene sets drive different biology in <i>Saccharomyces cerevisiae</i> and <i>Ashbya gossypii</i>	96	

EMBO Workshop: Experimental Approaches to Evolution and Ecology Using Yeast

Plech, Marcin Saturation mutagenesis and complementation tests of yeast essential gene Fol2 by its human homolog GCH1	97
Plocek, Vitezslav Mitochondrial retrograde signaling in yeast colonies: A new perspective	98
Rancati, Giulia Environmental Stresses Induce Karyotypic Instability in Colorectal Cancer Cells	99
Saarikangas, Juha Age-dependent transitioning of glutamate synthase into large-scale assemblies	100
Presenter: Paukstyte, Jurgita	
Schalck, Thomas Boosting ethanol production in bacteria by tolerance engineering: from fundamental research towards application	101
Serva, Saulius Systems biology of intrinsic yeast virus	102
Serviene, Elena Global gene expression change during Totiviridae dsRNA viruses infection in Saccharomyces cerevisiae	103
Slomka de Oliveira, Shai Exploring the impact of HGT on adaptation dynamics through lab evolution	104
Swamy, Krishna Proteotoxic Stress due to Loss of Interaction Partners Induces Reproductive Isolation in Yeast Hybrids	105
Tengölics, Roland Accelerated metabolome evolution and its phenotypic impact in Saccharomyces cerevisiae	106
Tronchoni, Jordi Yeasts with low acetic acid production for healthier wines	107

Usher, Jane Functional characterisation of novel oxidative stress protection proteins in the pathogenic yeast <i>Candida glabrata</i>	108
van Leeuwen, Jolanda Systematic assessment of genetic context-dependent gene essentiality	109
Vande Zande, Petra L Regulatory mutations' pleiotropic effects and their relationship to fitness	110
Vepštaite-Monstavice, Igle Metataxonomic analysis of berries-associated microorganisms	111
Verhoeven, Maarten D. Division of labour: evolution of a synthetic consortium of single-sugar-fermenting <i>Saccharomyces cerevisiae</i> strains on glucose-xylose-arabinose mixtures	112
Vermeersch, Lieselotte Unravelling the genetic determinants of natural variation in the <i>Saccharomyces cerevisiae</i> lag phase	113
Vulin, Clément Ecological and evolutionary implications of local environmental patchiness in colonies of yeast and other systems	114
Weber de Melo, Vanessa Temperature adaptation in the ciliate <i>Tetrahymena thermophila</i>	115
Wilkinson, Derek Yeast colony biofilms: Properties of surface and invasive cells	116
Williamson, Luke Characterising gene-gene interactions in the fitness landscape of a snoRNA	117
Nguyen Ba, Alex High-resolution lineage tracking of laboratory yeast populations over 1000 generations	118
