

Alp, Keziban Merve	
Identification of drug response markers by proteome and phosphoproteome profiling of patient-derived colon cancer xenografts	33
Appelman, Monique	
Calnexin depletion by ER-stress during cholestasis inhibits the Na⁺-taurocholate Cotransporting Polypeptide (NTCP)	34
Arribas, Ignacio	
Modification-specific proteomics: Molecularly Imprinted Polymers (MIPs) for selective enrichment of phosphohistidine-peptides	35
Ashraf, Faryal	
Studies on Virulence Factor EsxB Protein and type VII Secretion Protein EsaB from Vancomycin-resistant Staphylococcus aureus	36
Bader, Jakob	
Proteomic profiling of human glioma biopsies suggests mitochondria-based classification of IDH-mutant tumors	37
Baggelaar, Marc	
Development of a proteomics method to measure site specific S-palmitoylation stoichiometry	38
Balico da Silva, André L.	
Biochemical and pharmacological characterization of altered AT1 receptors bearing mutations associated to atrial fibrillation	39
Capelupe Simões, Sarah	
Proteomic analysis of the AT1 receptor signaling profile triggered by ligands with different pharmacological profiles	40
Ciuffa, Rodolfo	
Kinase interaction network expands functional and disease roles of human kinases	41
Conole, Daniel	
Capitalising on chemistry innovation to expand the impact of SFX-01, a novel therapeutic in multiple disease indications	42

Damato, Marina	
System biology approach to embrace cell plasticity	43
Das, Richa	
New roles for the de-ubiquitylating enzyme OTUD4 in RNA-protein network and RNA granules	44
De Cesare, Virginia	
Investigating non-canonical deubiquitylation by MALDI-TOF mass spectrometry	45
Eberl, H. Christian	
Photoaffinity probes and quantitative proteomics enable assessment of target engagement and compound potency in live cells	46
Efthymiopoulos, Theocharis	
Genotoxic stress response of the proteome of p53 deficient cells shown novel mechanisms of genomic instability	47
Fraternali, Franca	
Mutations and variations in health and disease: Protein interaction networks and their multiscale interpretation	48
Garcia Romeu, Hector	
Proteomics of the organelles involved in the uptake and early-trafficking of nano-sized drug carriers in cells	49
Gerner, Christopher	
Mitochondrial functions and dysfunctions in inflammatory stimulated CD4+ T cells and B cells from chronic lymphocytic leukemia patients point to molecular mechanisms of chronic diseases	50
Griesser, Eva	
Quantitative proteomics analyses of laser-capture microdissected FFPE human tissue	51
Hansen, Fynn M.	
A proteomics approach for large-scale site-specific stoichiometry analysis of ubiquitination	52

Heap, Rachel		
The L929 secretome – a study to understand the subtleties in bone marrow derived macrophage differentiation		53
Hickford Martínez, Ana		
Identifying novel cytosolic factors interacting with viral capsids		54
Hoermann, Bernhard	Presenters: Helm, Dominic; Hoermann, Bernhard	
An MS Approach based on Randomized Phosphopeptide Libraries to Study the Sequence Preference of Protein Phosphatases 1 and 2A		55
Janker, Lukas		
Deoxyvalenol and A431 epidermoid squamous carcinoma cells: proteomic profiling reveals the pathways connecting ribosomal inhibition with a loss of function of the cell membrane		56
Jevtic, Zivojin		
Identification of the NUP98-NSD1 interactors and their implication in leukemogenesis		57
Kallemeijn, Wouter		
Validation and invalidation of chemical probes for the human N-myristoyltransferases.		58
Kharde, Satyavathi	Presenter: Cherukumili, Madhuri	
Leveraging AI and machine learning to accelerate proteomics research		59
Latzer, Pauline		
Biomarker discovery and personalized treatment for glioblastoma		60
Lukauskas, Saulius		
Decoding chromatin regulation through data mining and chromatin proteomics		61
Machado, Susana		
Characterization of TRIB2-mediated drug resistance		62

Mari, Tommaso	
Multi-omics characterization of neuroblastoma cell lines	63
Menke, Frank	
Monitoring phosphorylation and ubiquitination in pattern recognition receptor signaling	64
Monserrat-Martínez, Ana	
Enteropathogenic E. coli interactome: the key to understand host-pathogen interactions	65
Mueller, Johannes Bruno	
A quantitative and comparative proteomic map of the tree of life	66
Muqaku, Besnik	
Local inflammation mediated by activated neutrophils correlates with favorable overall survival in ovarian cancer patients	67
Murphy, Sandra	
Comparative proteomics of the dystrophin-deficient mdx-4cv liver- identification of alterations in metabolic pathways	68
Neuditschko, Benjamin	
Multi omics evaluation of cutaneous melanoma cells and their cerebral metastasis reveal individually distinct molecular mechanisms	69
O'Reilly, Francis	
In situ structural proteomics reveals NusA as a physical link between transcription and translation in Mycoplasma pneumoniae	70
Ostermaier, Matthias	
Proteomic investigation of ubiquitylation in the DNA damage response	71
Parrotta, Elvira	
Unraveling differences in induced versus naive stem cells by integrated transcriptome, miRNome, whole proteome and phosphoproteome analysis	72

Phulphagar, Kshiti		
Dissecting Nlrp3 inflammasome activation with quantitative spatial proteomics		73
Pike, Ian	Presenter: Dennis, Richard	
A novel method for discovery of peripheral blood biomarkers in idiopathic pulmonary fibrosis using extensive depletion and TMTcalibrator™ tissue-enhanced plasma proteomics		74
Pimkova, Kristyna	Presenter: Hansson, Jenny	
Mapping thiol oxidative modifications in primary haematopoietic stem cells		75
Ravindran, Rishith		
Regulation of mitophagy by a novel endosomal ubiquitin ligase		76
Reim, Alexander		
Mapping protein-DNA interactions by a femtosecond UV-laser crosslinking mass spectrometry pipeline		77
Rogulja-Ortmann, Ana		
Post-translational modifications in Hox transcription factor specificity		78
Schessner, Julia		
Organellar protein mapping in iPSC derived neurons to study defects in neuronal protein transport		79
Slany, Astrid		
An in-depth proteome profiling analysis of primary human myeloma cells shows that adaptations to hypoxia are associated with multiple myeloma disease progression		80
Soffientini, Paolo		
insSTAGE-digging: a novel protocol for proteomic sample preparation and its application to study the biological role of Alternative Splicing Factors		81
Steidel, Michael		
Aggregation-based sample preparation for high-throughput proteomics		82

Tanzer, Maria	
Quantitative proteomic analyses reveal the release of lysosomal components during necroptosis	83
ten Have, Sara	
Proteo-genomic and phosphoproteomics analysis of human oesophageal tumour tissue	84
Treit, Peter	
Establishing an MS-based microbiome profiling platform	85
Tvardovskiy, Andrey	
Quantitative proteomics-based screening for nuclear proteins anchored to chromatin by RNA	86
van Bentum, Mirjam	
Profiling the cellular signalling state by targeted phosphoproteomics	87
Van Royen, Tessa	
Interactome analysis of the non-structural proteins 1 and 2 of human respiratory syncytial virus	88
Vrbacky, Marek	
Mitochondrial TMEM70 interacts with subunit c and facilitates its incorporation into the mammalian ATP synthase	89
Wilson, John P.	
Total solubilization of FFPE samples for reproducible high throughput clinical proteomics	90
Xie, Xiao	
Genetically encoded multifunctional protein photocrosslinkers	91
Yoshikawa, Harunori	
Full spectrum complexome analyses: Towards the comprehensive characterisation of cellular protein complexes by SEC-uHPLC	92
