

Becker, Martin	
A comprehensive CRISPR/Cas9 screening pipeline for functional genetics in patients' leukemia cells growing in mice	36
Bourgard, Catarina B. L.	
An implementation of in-silico molecular target identification for yeast target-based screening: rational design for antimicrobial drug discovery	37
Carlet, Michela	
A novel in vivo technique to molecularly validate potential targets for personalized therapy	38
Cichonska, Anna	
Leveraging synergy between metabolomics and genomics in biobanks to boost drug development	39
Dunham, Ian	
Target Identification and prioritisation strategies at Open Targets	40
Fawcett, Katherine	
SNPs associated with HHIP expression have differential effects on lung function in males and females	41
Fayyazi, Neda	
Molecular dynamics simulation and computer aided drug design of new quinoline-based analogues with dual potential against EGFR and VEGFR-2	42
Gandre-Babbe, Shilpa	
Pooled CRISPR-Cas9 mediated KO screens to identify novel targets modulating T cell exhaustion	43
Gomez Ramos, Borja	
Omics data integration for the identification of cell-type-specific gene regulatory networks and regulatory variants in Parkinson's disease	44
Henry, Albert	
Large-scale genome-wide association study of heart failure identifies novel susceptibility loci and provides a platform for drug target validation	45

EMBL–Wellcome Genome Campus Conference: Target Validation Using Genomics and Informatics

Hsu, Arthur	
Bioinformatics strategies for improving biosafety of gene therapy treatments	46
Koh, Eunjung	
GWAS: Understanding effect of genomic variations on environmental exposure and disease	47
Kurilov, Roman	
Drug response prediction in primary blood tumor cells using models trained on cell line data	48
Morris, Derek	
Genes influenced by MEF2C contribute to neurodevelopmental disease via gene expression changes that affect multiple types of cortical excitatory neurons	49
Muralidharan, Bhavana	
Identification of novel genetic and epigenetic regulators of disorders like schizophrenia and bipolar disorder	50
Ochoa, David	
Open Targets Platform: assisting drug target identification and prioritisation	51
O'Mara, Tracy	
Identifying candidate therapeutics for endometrial cancer using transcriptome-wide association studies	52
Saliba, James	
NFE2L3 transcription factor deficiency protects against colitis induced colorectal cancer through modulation of the tumor microenvironment	53
Sen, Rituparno	
Investigation of lncRNAs acting as precursors of snoRNAs and miRNAs by training a random forest classifier	54
Shrine, Nick	
Fine mapping of lung function association in the HLA region	55

Sousa, Sérgio F. Looking into protein targets from the perspective of the ligand	56
Spirito, Giovanni Identification and prioritization of candidate causal genomic variations from individuals affected by ASD	57
Staubli, Frank Validation of translational biomarker genes of NAFLD/NASH disease progression	58
Tomaz, Kaira C. P. Virtual screening and experimental validation of inhibitors of Plasmodium spp. casein kinases, CK1 and CK2a as potential antimalarial candidates	59
Vogt, Markus Identification of novel Myc-related therapeutic cancer targets by genetic screens	60
Williams, Alexander Analysis of genetic variants associated with respiratory infection susceptibility highlights potential causal mechanisms	61
