Ajayi, Ifetayo

**Takeda G-protein Receptor (TGR)-5 evolves classical active-state conformational signatures in complex with Chromolaena Odorata-derived Flavonoid-5,7-dihydroxy-6-4-dimethoxyflavanone**

Allihn, Patrick

**Chasing phosphoaspartate by Hydroxylamine-based reverse polarity ABPP**

Antolin, Albert

**The Chemical Probes Portal: Promoting the use of high-quality, peer reviewed chemical probes**

Bathla, Punita

**Development of Activity-based Reporter Gene Technology (AbRGT) for specific imaging of enzyme activity and drug screening**

Beckwith, Rohan

**CPSF3-dependent pre-mRNA processing as a druggable node in AML and Ewing’s sarcoma**

Benns, Henry

**A proteome engineering platform for the prioritisation of functional reactive amino acids in target-based drug discovery**

Berardi, Andrea

**Screening of new compounds inhibiting the interaction between the PHDv-C5HCH tandem domain of NSD1 and C2HR zinc finger module of Nizp1: A possible strategy against acute myeloid leukemia (AML)**

Berger, Lena Marie

**The importance of a kinome wide in cellulo selectivity assessment of kinase inhibitors and probes**
Bouricha, El Mehdi

**Virtual screening and molecular dynamics simulations for identification of potential inhibitors targeting DNA Binding Domain of ERs for treatment of hormone resistant breast cancer**

Burmester, Illip

**TMTcalibrator™ enhances mapping of tau phosphorylation in peripheral fluids**

Burmester, Illip

**A Glyco-TMT-SRM assay for measuring Plasma Clusterin Glycosylation associated with increasing brain atrophy in Alzheimer’s Disease**

Burmester, Illip

**A novel method for discovery of peripheral blood biomarkers in idiopathic pulmonary fibrosis using extensive depletion and TMTcalibrator™ tissue-enhanced plasma proteomics**

Chaikuad, Apirat

**Development of highly potent and selective pseudokinase CASK inhibitors by targeting a unique pocket adjacent to the GFG motif**

Presenter: Russ, Nadine

Conole, Daniel

**Development of a novel class of cell permeable deubiquitinating enzyme activity-based probes**

Cruz, André

**Using transcriptome analysis and small-molecule approach to get insight on mechanisms involving thyroid hormone action in the skeletal muscle**

De Leo, Federica

Presenter: Musco, Giovanna

**Diflunisal targets the HMGB1/CXCL12 heterocomplex and blocks immune cell recruitment**

de Vries, Rens

**Modulation of nuclear receptors through ligand architecture**

Depta, Laura

**Cellular characterization of isoform-selective covalent-allosteric Akt inhibitors**
Di Pillo, Fulvia
Identification of putative SRPK1 substrates in glioblastoma using small molecule probe 54

Dimitri, Chris
Predicting small molecule target tractability to prioritize and accelerate hit ID activities 55

Drechsel, Jonas
Activity based probes – beyond target identification 56

Duran-Frigola, Miquel
Large-scale bioactivity annotation of uncharacterised compounds 57

Eberl, H. Christian
Chemoproteomics finds drug targets in the dark proteome 58

Egner, Ursula
High-quality chemical probes and drug discovery: A pharmaceutical industry perspective 59

Florea, Bobby
Bio-orthogonal photoaffinity probes for PARP 60

Ghosh, Amrita
Insights into the structural consequences of insulin and human serum albumin due to chemical modification by captopril 61

Gourdel, Marie-Edith
Exhaustive yeast n-Hybrid technique to expand the druggable proteome for PPI stabilization and protein degradation 62

Goya Grocin, Andrea
Using chemical proteomics to understand the biological role of Methionine aminopeptidase 2 (MetAP2) and the effect of its inhibitors 63

Grant, Emma
PhABits – PhotoAffinity Bits to study protein-ligand binding 64
Hanke, Thomas
**The effect of macrocyclization on pyrazolo[1,5-a]pyrimidines as hinge-binders for the development of selective kinase inhibitors** 65

Haubrich, Kevin
**RNA dependent regulation of TRIM25 ubiquitination activity** 66

Hausch, Felix
**Transient binding pocket drug discovery for FKBP51** 67

Healey, Robert
**Discovery of inhibitors of sphingolipid metabolism using FRETceramides** 68

Howard, Ryan
**A cell-active target engagement probe for PARP inhibitors: Structure-guided design and in-cell target profiling** 69

Hübner, Ines
**Xanthocillin X - genomic and proteomic approaches to elucidate the mode of action** 70

Igumnova, Viktorija
**Genotype and allele frequencies of anti-tuberculosis drug metabolizing enzymes NAT2, GSTM1 and XDH in Latvian tuberculosis patients** 71

Irvine, Melissa
**The phosphostate of receptor tyrosine kinases influences the binding affinity of kinase inhibitors in cells** 72

Jacobsen, Kristian Mark
**Electrophilic natural products target mitochondria in hypoxic cancer cells** 73

Kalikanova, Yerkezhan
**Structure-guided CCL5 mutagenesis aimed to generate affinity-increased CCR5 ligands for therapeutic CCR5 blockade** 74

Kallemeijn, Wouter
**Exploring protein lipidation in polarized macrophages using chemical proteomics** 75
Koh, Cheng-Gee
*Understanding the different roles of POPX2 phosphatase in cancer metastasis* 76

Konrad, David
*Lead and target discovery by using elaborated diastereomeric fully functionalized probes in the human proteome* 77

Kumar, Santosh
*FGF and BMP signaling cooperate for smad1 activation (including nuclear localization and transcriptional activity) and stability through binding with Xbra* 78

Labeit, Siegfried
*Development of small molecules for chemical knock-down of MuRF1 to protect muscles from myopathy and wasting* 79

Landel, Ina
*Structural, in vitro and in vivo characterization of the Covalent-Allosteric AKT Inhibitor Borussertib* 80

Lechner, Severin
*Chemoproteomics profiling of 50 KDAC inhibitors reveals MBLAC2 as common off-target* 81

Legge, Devon
*A chemical approach to the interaction of host and microbe via formyl peptide signals* 82

Leijten - van de Gevel, Iris
*Elucidating the prerequisites of forming the allosteric pocket in ROR-gamma t* 83

Losada, Ana
*Studying protein S-acylation through a novel chemical genetic approach* 84

Lucas, Romain
*Synthesis and biochemical evaluation of new dual BET/HDAC inhibitors against pancreatic ductal adenocarcinoma (PDAC)* 85
Manojkumar, Manisha  
**Presenter: Nitsch, Lena**  
**Functional dissection of protein degradation**  
86

Mathur, Sunil  
**Photocrosslinking Activity-Based Probes (pABP) for RING E3 ligases**  
87

Meijer, Femke  
**Ligand-based design of allosteric RORgt inverse agonists**  
88

Moul, Sophie  
**Modulating protein activity using peroxisomal re-localisation**  
89

Myrzabekova, Moldir  
**Characteristics of miRNAs binding sites in mRNAs of genes of Equus caballus ZNF transcription factors**  
90

Nagai, Hiroaki  
**Identification of synaptic plasticity modulator through phenotypic screening in rat and human neurons**  
91

Naimo, Eleonora  
**Anovel antiviral inhibitor with broad activity against Kaposi Sarcoma Herpesvirus, Varizella Zoster virus and Adenovirus**  
92

Parui, Aasna  
**Elucidating the role of PDZ domain in the allosteric regulation of HtrA2 - A proapoptotic serine protease**  
93

Plotnikov, Alexander  
**Presenter: Barr, Haim**  
**Phenotype modulation with an epigenetic probe in colon cancer**  
94

Porta, Exequiel  
**Activity-based protein profiling (ABPP) of serine hydrolases for target discovery against Leishmaniasis**  
95

Prokofeva, Polina  
**Proteome-wide SAR unravels sepiapterin reductase probe**  
96

Quambusch, Lena  
**Covalent-allosteric inhibitors to dissect Akt isoforms in complex biological systems**  
97
